KEY FEATURES	BENEFITS
Waist-mounted light	Further increase distance of light from eyes, improving night vision. Allows user to tailor light, keeps light away from others and eliminates disorientation typical with headlamps. Light rides low on hips for added comfort and at most stable part of body.
3-Watt Luxeon LED	Hi-output, performance LED - clean, consistent and efficient light.
Fresnel Lens	Provides soft, even light with no 'hot spots' or 'hard edges'.
Beam width adjustment	Unique Rotary Dial twists to adjust beam from narrow to wide - 20' wide at 20' out at widest point (covers a two-lane road)
95° angle adjustment	Allows for fine-tuning the beam while moving from 10° above parallel to 85° angle down on road or trail - keeps light away from eyes.
Light weight Light	1.9 ounce weight eliminates light bounce, reduces feeling of light weight
Separate Battery Box	Keeps weight of batteries on back and positioned in most comfortable and secure location. Attaches to belt with thumb screw clip.
Cool Poly™	Allows units to remain cool during use and allows continuous use of high beam for up to 3 hours without overheating.
